Unlock

- ① Remove the 4 screws to unlock the Z-axis limiter.
- ② Cut the ziptie wrapped around the toolhead.
- ③ Remove the foam padding.

Lock Heatbed

① Tighten the 3 screws circled in green to lock the heatbed.

Purge Wiper Installation

- ① Slide in the Purge Wiper unit into the slot at the end of the X-Axis.

- ② Install the 1*M3-12 screw (For Purge Wiper) from the accessory box to fix the Purge Wiper in place.

Spool Holder Installation

- ① Install the spool holder base plate with the 2*M3-8 screws (For Spool Holder) from the accessory box.
- ② Slide in the spool holder. (match the slot orientation)

AMS lite Assembly

① Put the AMS lite body on the stand. (cable on the upward end)

② Secure the AMS lite with the 4*BT3-6 screws (For AMS Stand) from the accessory box.

AMS lite Assembly

- ① Slide the rotary spool holders on (all the way in), being careful to match colors to avoid damaging any parts.

AMS lite Assembly

580mm (short)

700mm (long)

- ① Put AMS lite to the right side of the A1 mini.
- ② Insert 700mm PTFE tubes into ports 3 and 4.
- ③ Insert 580mm PTFE tubes into ports 1 and 2.
- ④ Insert all four PTFE tubes into the toolhead filament hub.

Organizer Installation

① Install the organizer as shown in the diagram. ② Clip the black cable into the smaller hole.

③ The other four holes are for PTFE tubes.

(Recommend distance between A1 mini and AMS lite is 50mm as shown in the diagram.)

Powering On

- ① Plug the AMS lite 4pin connector into the port on the right of the A1 mini. (either one)

- ② Turn on the A1 mini using the power switch on the back.

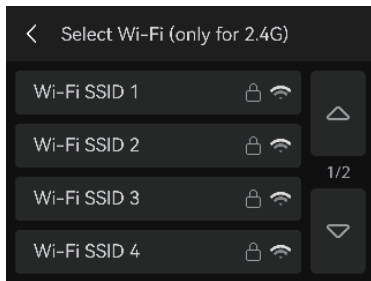

Please leave safety space for heated bed movement. (as shown in the diagram)

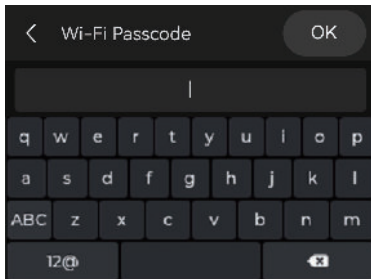

Network Setting

- ① Follow the instructions until you see this screen. Press “Select Wi-Fi” to search for available network.

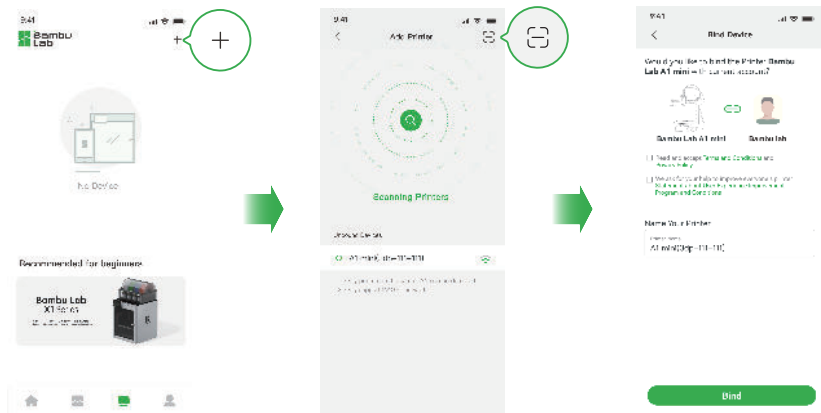

- ② Select your preferred network.

- ③ Input the passcode, and then press “OK”.

Printer Binding

- 1 Download the Bambu Handy App. Register and log in to your Bambu Lab account.
- 2 Use Bambu Handy to scan the QR code on the screen, and bind your printer to your Bambu Lab account.
- 3 Follow the instructions on the screen to complete the initial calibration. It is normal to have vibration and noise during the calibration process.

Spool Loading

- ① Orient spool installation according to the filament winding direction. (as shown in the diagram)

*Warning

- ① The AMS lite supports spools with a width of 40–68 mm and an inner diameter of 53–58 mm.
- ② Avoid using AMS lite to print flexible materials, including TPU, TPE, or absorbent PVA. Avoid using materials that are too hard (too high modulus) or too brittle (not enough toughness), including third-party fiber reinforcement materials (PA-CF/GF, PET-CF/GF, PLA-CF/GF, etc.). Please use external spool placement to print these filament.

Spool Loading

Note: Press the release button to disengage drive motor if filament stuck.

① Push the spool all the way onto the spool retractor.

② Feed the filament into the filament inlet.

External Spool (for non-AMS use case)

- ① Connect the toolhead filament inlet (either one of four) and the filament guide with the PTFE tube as shown in the diagram.
- ② Hang filament spool on spool holder then feed the filament line into the PTFE tube as shown in the diagram.

First Print

- ① Press “Print Files” to access the preloaded models on the SD card.

- ② Select the model you want to print.

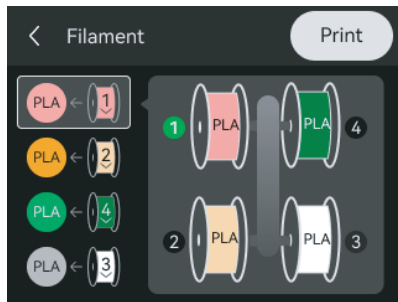

- ③ Turn on “Use AMS” if you are using filaments on AMS.

Turning on “Bed leveling” is recommended.

Turn on “Timelapse” for timelapse video recording.

AMS Mapping

Map the actual filaments you have to the print file preset filaments.

Note: We recommend using similar colors to match the preset. Otherwise the flush setting might be compromised.
